© Objective

The goal of this task is to enable the intern to explore Bootstrap 5's official examples and components, understand their structure, and then design their own clean, modern HTML pages using a combination of those components. The focus is not just on replication but on **visual appeal, component synergy**, and **layout composition**.

Scope of Work

- Review the examples provided in the official Bootstrap 5 Examples Section
- Extract high-quality UI patterns like:
 - Navbars
 - Sidebars
 - Hero sections
 - o Cards
 - o Footers
 - Layout templates (e.g., Dashboard, Album, Pricing)
- Combine selected components into original, visually appealing pages
- Ensure pages are responsive and clean
- Submit both the source code and a live working URL (GitHub Pages or Netlify)

X Technologies to Be Used

- HTML5
- CSS3
- Bootstrap 5 (Latest)
- Git & GitHub (for version control and hosting)

Task Breakdown / Deliverables

1. Setup

- Use Bootstrap 5 via CDN
- o Create file structure: index.html, about.html, contact.html, etc.

2. Component Collection

- o Go through Bootstrap example pages
- Identify attractive and well-structured UI components

o Collect navbars, cards, sidebars, layout sections, etc.

3. Page Design & Composition

- o Build at least 3 full pages
 - Home Page: Navbar, Hero section, Feature area, Footer
 - About/Services Page
 - Contact Page (with form)

4. Styling & Final Touches

- Maintain consistent spacing, colors, and layout
- o Ensure responsive behavior on mobile/tablet
- o Use Bootstrap utility classes smartly

5. Hosting & Submission

- o Push project to GitHub
- o Deploy using GitHub Pages or Netlify
- Submit both:
 - GitHub repository URL
 - Live deployed project link

Expected Outcome

The intern will:

- Gain real-world practice with Bootstrap 5
- Learn how to combine layout components creatively
- Improve sense of design, UI/UX, and page composition
- Deliver clean, responsive, and attractive HTML pages

♦ Guidelines

- Only use **Bootstrap 5** no other frameworks or libraries
- Do not copy-paste full example pages extract and remix creatively
- Make the pages look good focus on clarity and polish
- Keep code clean: indentation, structure, naming
- Ask for feedback when stuck or unsure

Submission Format:

- GitHub Repository: github.com/yourusername/project-name
- Live Preview Link: yourproject.netlify.app or yourusername.github.io/project-name
